

T **TRÉAN GROUP, LLC**, was formed as a boutique shop offering expertise in pit brokerage, futures clearing, and client execution. As the leading pit brokerage firm for SOFR options at the Chicago Mercantile Exchange (CME), we play a central role in price discovery for options trading across all Short-Term Interest Rate (STIR) products. Meanwhile, our seasoned execution team services a broad range of financial clients, including money managers, portfolio accounts, hedge funds, and proprietary trading firms. Our innovative clearing team focuses on unique solutions to minimize cost exposure and best align client interests with our network of FCM partners.

WHY TRÉAN?

- **TRÉAN has expanded its execution services** beyond macro futures and rates for greater client flexibility, such as growing its footprint as an expert and agent in the synthetic funding markets that have become more critical than ever to the success of funding and managing client balances and positions.
- **TRÉAN's Clearing & Sales Division leverages our relationships to create strategic alliances** between capital providers and managers, enhancing trading processes. Our dedication to collaborative advancement with our clients generates robust and innovative solutions across all areas of the trade process, including account origination and growth, technology introductions, front- and middle-office applications, and, of course, post-trade support.
- **Since 2003, TRÉAN has embarked on a program to connect our client partners with innovative sources of capital and funding.** That has fostered further innovation on the part of both our investor clients and our trading partners.
